DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 29 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is directed to a computer telephone system, and claim 26 is directed to a service module. Should claims 29 and 30 depend on claim 26 instead claim 1?

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily

published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- 4. Claims 1-40 are rejected under 35 U.S.C. 102(e) as being anticipated by Katz et al. (U.S. 6,343,086 B1).
- As to claims 1, 7, 14, 21, 26, 31 and 33-35, Katz et al., in figs. 2-3 and the description associated with the figures, disclose a method for multi-platform communication in a computer telephony system, the system comprising: computer telephony platforms (PC platforms); service modules (boards 1-4); intra-platform packet routers (MVIP bus 10); and an inter-platform packet router (MVIP-MC1, see col. 6, lines 54-58), each with specific structure and functions as recited in the claims.
- As to claims 2, 8, 15, 22, 27, 36 and 3, 9, 16, 23, 28, 37, the claimed limitations are standard in the art.
- As to claims 4, 10, 17, 24 and 38, it is inherent that each of the resources in Katz et al. comprises one of a hardware device and a software object.
- As to claims 5, 13, 20, 25, 29, 32 and 39, the teaching in Katz et al. encompasses the claimed limitations (see fig. 2).
- As to claims 6, 11,12, 18, 19, 30, and 40, the teaching in Katz et al. encompasses the claimed limitations (see col. 1, lines 37-42).
